The Future Workforce: Empowering all Virginia’s Learners for a Rapidly Changing World

How do we empower all learners today and prepare them for a rapidly changing world? A driving force behind this change is technology. It affects the way we live, the way the world works, and the kind of skills people need to thrive. Technology also presents unique opportunities for learning.

Come and examine the future of learning and explore how schools should be preparing graduates. This conference will bring together dynamic speakers addressing issues that are important and relevant to every school division regardless of locality.

We hope that you will join us for what is sure to be an exciting conference!
